PROJECTS

AirBnB_clone Date period

ALX_Project

This project is a simplified clone of Airbnb, a popular online marketplace for arranging or offering lodging, primarily homestays, or tourism experiences.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

EFET-School-Project Date period

Location

A functional website that manages all student data, including personal information, attendance, grades, payments, and messaging, is essential. There should be three account types: admin, teacher, and student, each with its specific options and privileges.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

SUMMARY

As a driven software engineering student with a robust foundation in computer network systems. My enthusiasm for technology is equally balanced with my commitment to ongoing learning and self-improvement. Studying at The ALX African School, I am deeply engaged in the vibrant field of software engineering, sharpening my abilities and establishing a strong base for my prospective career.

SKILLS

Git · Bash · Python · JavaScript ·

HTML · CSS
